

Roman Guevarra

Hamilton, ON • 289-877-8191 • romanguievarra2003@gmail.com • [Linkedin](#)

Technical Skills:

- Languages: TypeScript, JavaScript, Python, C/C++
 - Frontend & Web: React, Next.js, HTML/CSS, responsive UI development
 - Backend & Data: REST APIs, JSON/HTTP, PostgreSQL, Prisma ORM, relational database design
 - Developer Tools: Git, GitHub, VS Code, WSL/Linux, Postman, Prisma Studio
-

Projects:

Personal Finance Tracker

- Developed a full-stack finance tracker application using Next.js, TypeScript, PostgreSQL, and Prisma ORM
 - Designed relational database schema and API routes to support accounts, transactions, bills, budgets, and household-based access
 - Built responsive dashboards for real-time account visibility, transaction tracking, budgeting, and financial summaries
 - Debugged application behaviours across forms, API responses, database queries, and frontend states to improve reliability and usability
-

Work Experience:

Web Development & Cloud Deployment Associate, Civiconnect | Jan. 2023 – Apr. 2023

- Developed and deployed responsive web applications based on client requirements and iterative feedback
- Translated business and user needs into functional application features across frontend interfaces and supporting logic
- Collaborated with clients and teammates to clarify requirements, troubleshoot issues, and refine implementation details

Automation Engineer, Billyard Insurance Group | Jan. 2024 – Apr. 2024, Apr. 2025 – Aug. 2025

- Developed internal dashboard tooling to track automation status, workflow failures, and issue resolution across business-critical processes
 - Integrated automation status data from Jira and Power Automate to support troubleshooting, reporting, and operational visibility
 - Debugged failed workflows and validated automation behaviour to improve reliability
 - Documented workflow logic, issue patterns, repro steps, and troubleshooting guidance to support long-term maintainability
-

Education:

Hon. Bachelor of Computer Science, University of Waterloo | Sept. 2021 – Jun. 2026

Coursework included Operating Systems, Computer Networks, Software and Systems Security, Database Management, Algorithms, and Information Systems Management.

Hon. Bachelor of Business Administration, Wilfrid Laurier University | Sept. 2021 – Jun. 2026

Focused on strategy, operations, communication, marketing, and technology management.
